DETAILED ACTION***Election/Restrictions***

Applicant's election with traverse of Species B, Figure 2 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the Preliminary Amendment cancelled claims 12-14, which according to a restriction requirement placed on the parent application, were indicated as drawn to Species B, Claims 12-14. Applicant argues that since Species B was chosen for prosecution in the parent application, the remaining claims 1-11 read on the other species of Figure 1. This is not found persuasive because in the specification of the instant application there are clearly two different species. Although the species of Figure 2 was elected by Applicant for prosecution in the parent application, it does not exclude the possibility that any of the original claims of 1-11 or any claims that Applicant may add later in prosecution of the child application would not be directed to Figure 2.

The requirement is still deemed proper and is therefore made FINAL.

Claims 8, 10, and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species of Figure 2, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Change et al (US 5,419,766). Change et al discloses an apparatus comprising a needle cannula having a distal point, a tip protector having a base, means coupled to the tip protector, a gasket coupled to the tip protector base, means coupled to the needle cannula shaft impeding movement of the tip protector, a flash chamber, a tab, a crimp (Figures 2c, 6a-6c).
